Eric:

Just sending you a Happy 100th Birthday message.

You share May 25th with my sister.

regards,
Saul Teichman

Dear Saul:

Thank you for the greetings on my 100th. If there are 6,000,000,000 people in the world and 365 birthdays in a year your sister and I have a lot of company. My very best to you. Eric

[REDACTED] <[REDACTED]> Sat, Sep 3, 2011 at 2:37 PM
to: [REDACTED]

Eric:

I trust all is well.

Jeff Reichenberger wrote a nice article about the 1913 nickels for the September 2011 Numismatist.

It contains a color image of the Judd 1954. Years ago I got a black & white image of the piece from you and David Lange for use on the uspatterns.com website. Would it be possible now to get that color image for the site.

Please advise.

regards,
saul

Dear Saul:

I was glad to hear from you. I knew the Jeff Reichenberger article on the 1913 Type II Indian head nickel in copper was just published but have not seen The Numismatist for September 2011 as yet because I am on vacation. Please ask Jeff for the image you wish. I am glad to approve that cooperation.

My best.

Eric .

Eric:

I trust all is well.

Is there an inventory of the pattern pieces you have given to your Money Museum.

As you may know, the uspatterns.com website has inventory listings of those museums which have a significant number of pieces including the ANA, ANS, Connecticut State Library, Durham Western Heritage Museum, Harry Bass Research Foundation, Library Company of Philadelphia and the Smithsonian.

They can be found at the link - <http://uspatterns.com/muscol.html>

I would like to include your holdings as well.

Please advise.

regards,
Saul

Dear Saul:

I appreciate your suggestion that our US pattern coin holdings be made publicly listed. They are virtually all together in 10 inch long box except for silver center cent, copper and silver dismes, American colonials, one 1879 \$4, one Gobrecht \$1, 1913 copper 5 Cent Indian Type II and perhaps a couple of others held with regular issue holdings. I do not think I have a separate written list of patterns and one would have to be prepared from our yearly records or from the envelopes holding the pieces. I have never emphasized my interest in patterns because they were too often struck openly or secretly for collectors and I considered those activities artificial after studying the 1804 dollars. I parted with many of my patterns over 60 years ago.

In my archives I do have listed is the Green Estate pattern holdings (excluding patterns of \$5 gold and over) which I acquired with Burdette G. Johnston and which list was prepared by him.

I also have the Armin Brand portion or perhaps all of the Virgil Brand collection with values which was turned over to Johnson for sale, for inventorying or for division between Brand brothers.

These are enormous piles of sheets, many stapled together on delicate paper.

Anyone would go into paralysis to look at the stuff.

I am piled up with other numismatic research. I want you to know about them unless you already do. I never want to hold back information to sincere researchers but cannot take care of all of them.

My very best to you,

Eric

Dear Saul:

I forgot to mention the 1868 aluminum set of all US denominations as it is on display at my museum.

As to the silver dime I and Johnson acquired in 1941 I did not want it because I think it was tooled and had the date removed. so I let Johnson sell it. When I wrote down pattern items for you I must have written "dime" when I meant "half dime" (the routine piece).

What I believe I do have is the 1792 copper 10 cent piece.

I forgot to mention the plain edge unique Nova Constellatio 100 mill silver piece if that is supposed to be a US pattern.

Do you have the enormous list of US patterns which were in the Green Estate which I mentioned in my last Email?

Thank you very much for helping me straighten out some of our holdings, Eric

Eric:

thanks for the followup.

Regrettably, I do not have a listing of the patterns in the Green estate or the Newcomer estate. They sold way to high for me in the Ford library sales.

Is it possible for you to send a copy to me ?

I have gone through all of the Brand journals in the ANS to cherry pick for some patterns and other items - boy was that painful !!

regards,
Saul

Subject: Re: patterns in Eric Newman Money Museum

Dear Saul:

I forgot to mention the 1868 aluminum set of all US denominations as it is on display at my museum.

As to the silver dime I and Johnson acquired in 1941 I did not want it because I think it was tooled and had the date removed. so I let Johnson sell it. When I wrote down pattern items for you I must have written "dime" when I meant "half dime" (the routine piece).

What I believe I do have is the 1792 copper 10 cent piece.

I forgot to mention the plain edge unique Nova Constellatio 100 mill silver piece if that is supposed to be a US pattern.

Do you have the enormous list of US patterns which were in the Green Estate which I mentioned in my last Email?

Thank you very much for helping me straighten out some of our holdings, Eric

In a message dated 10/28/2011 9:09:07 A.M. Central Daylight Time, [REDACTED] writes:

Eric:

Thanks for your reply. I did not know you had a silver Dime !! Do you have the Norweb coin or is there a 4th out there ?

You have also been credited with having a cased 1868 Aluminum proof set.
Is that still the case ?

regards,
Saul

Subject: Re: patterns in Eric Newman Money Museum

Dear Saul:

I appreciate your suggestion that our US pattern coin holdings be made publicly listed. They are virtually all together in 10 inch long box except for silver center cent, copper and silver dismes, American colonials, one 1879 \$4, one Gobrecht \$1, 1913 copper 5 Cent Indian Type II and perhaps a couple of others held with regular issue holdings. I do not think I have a separate written list of patterns and one would have to be prepared from our yearly records or from the envelopes holding the pieces. I have never emphasized my interest in patterns because they were too often struck openly or secretly for collectors and I considered those activities artificial after studying the 1804 dollars. I parted with many of my patterns over 60 years ago.

In my archives I do have listed is the Green Estate pattern holdings (excluding patterns of \$5 gold and over) which I acquired with Burdette G. Johnston and which list was prepared by him.

I also have the Armin Brand portion or perhaps all of the Virgil Brand collection with values which was turned over to Johnson for sale, for inventorying or for division between Brand brothers.

These are enormous piles of sheets, many stapled together on delicate paper.

Anyone would go into paralysis to look at the stuff.

I am piled up with other numismatic research. I want you to know about them unless you already do. I never want to hold back information to sincere researchers but cannot take care of all of them.

My very best to you, Eric

In a message dated 10/24/2011 12:48:31 P.M. Central Daylight Time, [REDACTED] writes:

Eric:

I trust all is well.

Is there an inventory of the pattern pieces you have given to your Money Museum.

As you may know, the uspatterns.com website has inventory listings of those museums which have a significant number of pieces including the ANA, ANS, Connecticut State Library, Durham Western Heritage Museum, Harry Bass Research Foundation, Library Company of Philadelphia and the Smithsonian.

They can be found at the link - <http://uspatterns.com/muscol.html>

I would like to include your holdings as well.

Please advise.

regards,
Saul

Eric:

Happy New Year.

I trust all is well.

I was able to view F.C.C. Boyd's appraisal of the Col Green collection which was just sold by Kolbe-Fanning books over the weekend.

On page 26 of the appraisal which contained the early half eagles which were not cleaned or polished (those were on another page,

I noted the following counts

1795 small eagle 60

1795 large eagle 6

1798 small eagle 1 (a second was in the cleaned and polished section)

1815 2

1819 5 (a sixth was in the cleaned and polished section)

1821 4

1823 7

1824 5

1825 6

1826 7

1827 2

1828 5 (Boyd does not appear to have differentiated between 1828 and 1828/7)

1829 Large 1

1829 Small 1 (a second was in the cleaned and polished section)

1830 9

1831 7

1832 7 (13 stars) + 1 (12 star)

1833 7

I was wondering if you were involved in the sale of some of the many duplicates he had as we are trying to determine where they all went.

It is likely that many went to the following

Farouk

Weihman

Bell (Jake Shapiro)

FCC Boyd

James A Stack

Amon Carter

but I was wondering if there were more details.

regards,

Saul

[REDACTED] <[REDACTED]>
To: [REDACTED]

Tue, Feb 5, 2013 at 1:53 PM

Eric:

I trust all is well. Do you have JPEG images of your 1792 coinage ?

I just proved that the ANS J2 with the cracked obverse die ex Higgy-Boyd is not genuine. Its host was the Parmelee, Brand, Norweb coin. We found almost a dozen markers between the 2 pieces - rather neat.

We are trying to get images of the silver cent cents and dismes to see how many more may have been hosts for the casts, and electros.

regards,
Saul

Dear Saul:

After e-mailing you on February 6, 2013, I remembered my silver center cent was obtained from Fred Boyd via exchange for several Pine Tree shillings. Fred Boyd sent me four silver center cents which he had and told me to pick one. He was testing me. I returned to him the three forgeries and kept the genuine piece. It may have been that the center pieces were full silver electrodes or silver plated electrodes.

Dear Saul:

I was fascinated to receive your comments concerning the J2 1793 coinage in our possession.

We will be glad to cooperate and try to locate the two coins which we own and which you have requested images. They are in one of our bank vaults. What we would like from you is an image of both types of coins which you believe are casts or electrodes.

We want to assure you that we will retain this information in a confidential manner that you determine and have no desire to disclose any information that you have discovered without your written permission.

As you may know, these items in our collection are from the Green Estate in the 1941 period. If you need more information as to these coins or similar ones from other sources, we can undertake to find Johnson's inventory and sale to others which we retain the invoices and those sold through them.

We are delighted to hear from you and hope we retain enough of our marbles to cooperate.

Eric:

I believe your J1 and J10 are originals but what we are trying to determine is if others are copies so the more "host" coins we see, the more likely we are to determine if other fakes exist as there have been questions regarding the J2s in the ANA Museum, the Lohr example and the Anton piece. Even the Lauder example has been questioned in the past.

I do not know if I sent you these in the earlier email but here are images of the Norweb and the ANS coin marked up.

All of the scratches etc circled on the Higgy-Boyd-ANS example, appear on Parmelee, Brand, Norweb, A. Weinberg piece so the Norweb coin had to be the host for the creation ANS piece. I do not understand how this and the other copies got the obverse crack. Robert Hoge at the ANS has asked me about that as well but I do not know enough about how copies are made to answer his inquiry. The ANS has the only copy I have seen in copper although they also have similar silvery base metal examples as well. They thought these were base metal copies of the Higgy coin as opposed to all of them, including the Higgy coin, being copies.

Oh well. I also discovered that the Mitchelson 1815 half eagle in the Connecticut State Library collection was a doctored 1813 so I helped ruin their day too.

regards,

Saul

Eric:

I would need your mailing address if you want hard copies of those 2 images.

As for the Mitchelson 1815, if they weren't doing something to the showcase which allowed them to take out the 1815 and image for Heritage's little monograph on them, they would still think it was original and not an altered date.

regards,
Saul

Dear Saul:

As to your 2/06/13 message I will need time to study and think about most of the matters mentioned. Please send me by post office mail hard copies of your images .

EPNNES by Eric

Dear Saul:

Your mention of the Mitchelson Collection at the Connecticut State Museum suggests that long ago they had similar problem which was straightened out. EPNNES by Eric

In a message dated 2/6/2013 4:12:51 P.M. Central Standard Time, [REDACTED] writes:

Eric:

I believe your J1 and J10 are originals but what we are trying to determine is if others are copies so the more "host" coins we see, the more likely we are to determine if other fakes exist as there have been questions regarding the J2s in the ANA Museum, the Lohr example and the Anton piece. Even the Lauder example has been questioned in the past.

I do not know if I sent you these in the earlier email but here are images of the Norweb and the ANS coin marked up.

All of the scratches etc circled on the Higgy-Boyd-ANS example, appear on Parmelee, Brand, Norweb, A. Weinberg piece so the Norweb coin had to be the host for the creation ANS piece. I do not understand how this and the other copies got the obverse crack. Robert Hoge at the ANS has asked me about that as well but I do not know enough about how copies are made to answer his inquiry. The ANS has the only copy I have seen in copper although they also have similar silvery base metal examples as well. They thought these were base metal copies of the Higgy coin as opposed to all of them, including the Higgy coin, being copies.

Oh well. I also discovered that the Mitchelson 1815 half eagle in the Connecticut State Library collection was a doctored 1813 so I helped ruin their day too.

regards,
Saul

Dear Saul:

I was fascinated to receive your comments concerning the J2 1793 coinage in our possession.

We will be glad to cooperate and try to locate the two coins which we own and which you have requested images. They are in one of our bank vaults. What we would like from you is an image of both types of coins which you believe are casts or electrodes.

We want to assure you that we will retain this information in a confidential manner that you determine and have no desire to disclose any information that you have discovered without your written permission.

As you may know, these items in our collection are from the Green Estate in the 1941 period. If you need more information as to these coins or similar ones from other sources, we can undertake to find Johnson's inventory and sale to others which we retain the invoices and those sold through them.

We are delighted to hear from you and hope we retain enough of our marbles to cooperate.

My mailing address for the images is ERIC P. NEWMAN [6450 Cecil Ave. St. Louis](#) MO 63105

I am pleased to inform you that I have located my correspondence and memos with my early close friend Fred C, C.Boyd about the silver cent matter and am mailing copies of it to you.

It will hopefully help you some. Hope you are not iced. Eric

In a message dated 2/7/2013 11:48:15 A.M. Central Standard Time, [REDACTED] writes:

Eric:

I would need your mailing address if you want hard copies of those 2 images.

As for the Mitchelson 1815, if they weren't doing something to the showcase which allowed them to take out the 1815 and image for Heritage's little monograph on them, they would still think it was original and not an altered date.

regards,
Saul

Eric:

Thanks. I will mail you the 2 images, the ANS image will have the scratches and marks which match to the Norweb coin circled. I do not know when these copies were made. Obviously, it had to be prior to 1937 as I doubt the Norweb coin was available for this once Brand and his family had it. Steigerwalt purchased the J2 in Parmelee's sale so perhaps these were made at that time. Breen notes that Dr. Judd's J1 was also used to make copies. Regrettably, I do not know who owns this. Either this or the Stearns coin is owned by Don Patrick, the other might be in Bill Anton's collection but I am not sure.

As for yours and your J10, please email the correspondence and/or images to me at the following address.

Eric:

I trust all is well.

I see from the E-sylum that you are selling some of your coins through Heritage.

It is noted that you are selling some pattern coins.

What exactly are you selling. In earlier discussions, you noted that, with regard to patterns, you only had the 1792 coinage, a Gobrecht dollar, a Stella and the 1868 aluminum proof set and of course the plain edge Nova Constellatio.

Is there more ?

regards,
Saul

Dear Saul:

I was fascinated to receive your comments concerning the J2 1793 coinage in our possession.

We will be glad to cooperate and try to locate the two coins which we own and which you have requested images. They are in one of our bank vaults. What we would like from you is an image of both types of coins which you believe are casts or electrodes.

We want to assure you that we will retain this information in a confidential manner that you determine and have no desire to disclose any information that you have discovered without your written permission.

As you may know, these items in our collection are from the Green Estate in the 1941 period. If you need more

information as to these coins or similar ones from other sources, we can undertake to find Johnson's inventory and sale to others which we retain the invoices and those sold through them.

We are delighted to hear from you and hope we retain enough of our marbles to cooperate.

Eric P. Newman Numismatic Education Society

Eric:

I trust all is well.

I see from the E-sylum that you are selling some of your coins through Heritage.

It is noted that you are selling some pattern coins.

What exactly are you selling. In earlier discussions, you noted that, with regard to patterns, you only had the 1792 coinage, a Gobrecht dollar, a Stella and the 1868 aluminum proof set and of course the plain edge Nova Constellatio.

Is there more ?

Eric..

I am resending this as my Lotus notes crashed while sending this.

Thanks. I will mail you the 2 images, the ANS image will have the scratches and marks which match to the Norweb coin circled.

I do not know when these copies were made. Obviously, it had to be prior to 1937 as I doubt the Norweb coin was available for this once Brand and his family had it. Steigerwalt purchased the J2 in Parmelee's sale so perhaps these were made at that time. Breen notes that Dr. Judd's J1 was also used to make copies. Regrettably, I do not know who owns this. Either this or the Stearns coin is owned by Don Patrick, the other might be in Bill Anton's collection but I am not sure.

As for yours and your J10, please email the correspondence and/or images to me at the following address.

Saul Teichman
213-06 75th Avenue
Oakland Gardens, New York 11364

Queens did not get nearly as much snow as was forecasted. We got only 5-6 inches where I live.

Be well.

regards,
Saul

Eric:

I trust all is well. I received a brochure from Heritage containing some of your pattern pieces.

You are selling some wonderful coins there.

I asked Heritage to have the one presently slabbed as Judd-479 corrected as yours has a different obverse die and is either a Judd-520 if it is lead or a Judd-520a if it is white metal. The latter would be a new discovery although Kagin's cataloged the Crouch coin as white metal instead of lead in their October 1983 sale.

regards,
Saul

Hi Saul,

It's great to correspond with you directly. I'm happy to help with all of your queries. My home phone is [REDACTED] Mobile is [REDACTED] Please call or email anytime to discuss questions / concerns that you may have.

Regarding patterns retained by EPNNES - I think that you have the complete list, unless you (as I) consider the following as patterns and/or semi-official essays; Copper and Brass Continental Dollars, the Nova Constellatio Bit with plain edge and the 1792 Hancock issues.

I can try to help you with sourcing the patterns discussed. We are under the gun this week editing descriptions, so give me some time. Also, I would like to discuss the 1792 silver and non-silver center cents with you.

Best,

Stu

On Mar 17, 2013, at 7:57 PM, [REDACTED] wrote:

Stu:

Wayne Homren sent me your email address.

As you may know, I helped create and edit the uspatterns.com website. I have also been corresponding directly with Eric regarding his patterns and other topics for several years. Recently, we have been discussing the silver cent patterns, especially those without a silver center after I noticed that the ANS example, ex Hlggy, Boyd and all others which show a cracked obverse die, was a copy made from the Parmelee, Brand, Norweb coin.

I have also been one of the few people to go through the Brand journals and some of Armin Brand's papers in the ANS.

In any event, I have been trying to pedigree the many pieces being sold. As B.G. Johnson was handling both Armin Brand's patterns and the Col Green patterns at about the same time, I have had difficulty determining which one was the source. I do know that the 2 1877 half dollars, for example, do not match the ones on a set of 1911 Adams plates which I own that Brand purchased at the time so those are likely Col Green coins. Brand's 10 silver examples (journal id 57883-57892 are attached.

The consigning and subsequent sale of Armin's portion of the Brand gold patterns in gold is attached should that be of any interest to you.

I would also like to know what patterns were being kept by the EPNNES. In emails with Eric, I am aware of his 1792 pieces, the 1868 cased aluminum proof set, a Gobrecht dollar, a gold stella, the 1913 copper buffalo nickel and a second 1915 silver pan pac but am not aware of any others. Any help you can provide would be greatly appreciated.

regards,

Saul

Wayne / Stu:

Some notes with regard to the Newman ledgers.

If you look at the listing, it shows for example many of the rare Gobrecht dollar mules including J59, J61, J63, J65 (2), J85 (2), J88, J105 (2) and J108. It also show 2 Amazonian dollars in silver, 3 in copper and 2 in aluminum, 3 Judd-345s and so on. Wonder why Eric didn't keep one of these for his collection.

With regard to the Gobrechts. If these are ex Newcomer and not Brand coins, then there are at least 4 J65s, 3 J88s and 3 J108s out there as Brand owned one J65 (WWC Wilsons #90912), 2 J88s (ex WWC Wilson and ex Granberg) and 2 J108s (ex WWC Wilson and ex Granberg). Now it is possible that Col Green might have been able to purchase the Brand coins in the early 1930s but this is not likely.

What do the paid stamps mean on these ledgers as those coins, apparently, are not in Newman's collection ?

regards,
Saul

Eric:

it is good to hear from you again. I trust all is well.

I am not surprised that you are busy right now. The pieces you are offering are going to bring strong prices. It is likely that your 1845 proof set will get broken up. Hopefully, someone will be smart enough to keep it intact along with the case as sets like this are extremely rare these days.

I will likely bid on your Judd-606 as it is one of the few R-7 items which may be affordable. I once also owned a copper shield earring quarter. I traded it ultimately into a silver Amazonian quarter.

in any event, I hope to hear from you soon after everything subsides.

Len / Stu:

I noticed that the listings you sent me also included the gold Baker 20A.

That coin is ex Parmelee, DeWitt Smith, Brand (journal id 46483). It went to Armin Brand who sold it 6/27/33 to Wayte Raymond for \$2500 less 10% commission to B.G. Johnson.

It is actually one of the few items which appears to have a Brand, Col Green pedigree.

Regards,

Saul

He's most likely correct. I'm not 100% sure, I'll have to verify,

So: Parmelee, Smith, Brand, via Johnson to Raymond to Green, Green estate to Johnson/Newman to Newman to EPNNES?

Eric:

It has been a while since I last corresponded with you.

I trust all is well.

I was reading the Truth Seeker book about you – neat stuff.

Just a quick note with regard to the gold Baker 20b.

The coin went from Parmelee to Dewitt Smith and then went to Virgil Brand and was entered into his ledgers as #46483.

It was sold to Wayte Raymond circa 1930-2 (the exact date is in the Armin Brand papers in the ANS) and then to Col Green, one of the few coins with a Brand – Col Green pedigree.

Regards,

Saul

Saul-

You have just put yourself in a most elite group – you have found a correction to a Newman publication.

Eric states in his 1976 (*Studies on Money in Early America*) paper on the subject "Walter Breen stated that Brand was an owner (*Numismatic News*, Nov. 27, 1973), but there is no record of it in Brand's acquisition and inventory book."

In Eric's defense he did not have online access to the Brand ledgers!

The Brand ledger page is:

<https://www.archive.org/stream/secondaryledger700unse#page/n169/mode/2up>

Note no price is listed as this was part of a collection purchase *en bloc* from Dewitt Smith.

Regards,

Len.

Len:

Thanks. As for the error in a Newman publication, I won't tell if you won't. Surprising that Breen missed that as I found the listing for the gold piece some 20 years ago when I had previously gone through the journals at the ANS doing pattern research and getting dust all over my fingers – the Brand journal binders are really dry.

By the way, I did find when Wayte Raymond got this.

It was listed in Armin's Rarity Box 2 with the notation "6/27/33- Sold to Wayte Raymond for \$2500.00 less 10% commission to B.G.Johnson."

As you know, Armin consigned many Brand pieces to BG Johnson especially in the 1930s. It appears Horace did things differently.

The problem with the journals is that some of the most important purchases, Dr Hall, Wurtzbach and Brenner are not itemized.

I am hoping to find more of what I attached – these are in the ANS but not yet available on the Newman portal. I do not know how extensive those are.

I do not know if the Brenner stuff is in there somewhere as there are a lot of patterns attributed to Brand that I have not found in the journals.

I find the way Brand collected to be eclectic. There are certain items he liked and others he ignored. It appears having one of each date and mintmark, something Clapp, Granberg and Newcomer appear to have been doing, was not in Brand's plan, but if he liked something ie 1876 \$3, of 1870-S gold dollars, he would buy them in quantity.

If we ever get a Colonel Green appraisal up on the portal, I will create a listing of it like I did for the Brand journals.

The appraisal gives grades and counts of items but no sources.

Regards,

Saul

I agree that Brand collected first what he liked, then to fill-in and keep current - much as other collectors of the era, only Brand had no budget. He had that advantage of being able to buy large collections so he could acquire a few he liked. Nice job.

As you know, Armin consigned many Brand pieces to BG Johnson especially in the 1930s. It appears Horace did things differently.

The problem with the journals is that some of the most important purchases, Dr Hall, Wurtzbach and Brenner are not itemized.

I am hoping to find more of what I attached – these are in the ANS but not yet available on the Newman portal. I do not know how extensive those are. I do not know if the Brenner stuff is in there somewhere as there are a lot of patterns attributed to Brand that I have not found in the journals.

I find the way Brand collected to be eclectic. There are certain items he liked and others he ignored. It appears having one of each date and mintmark, something Clapp, Granberg and Newcomer appear to have been doing, was not in Brand's plan, but if he liked something ie 1876 \$3, of 1870-S gold dollars, he would buy them in quantity.

If we ever get a Colonel Green appraisal up on the portal, I will create a listing of it like I did for the Brand journals.

The appraisal gives grades and counts of items but no sources.

Regards,
Saul

Saul-

You have just put yourself in a most elite group – you have found a correction to a Newman publication.

Eric states in his 1976 (Studies on Money in Early America) paper on the subject "Walter Breen stated that Brand was an owner (Numismatic News, Nov. 27, 1973), but there is no record of it in Brand's acquisition and inventory book."

In Eric's defense he did not have online access to the Brand ledgers!

The Brand ledger page is:

<https://www.archive.org/stream/secondaryledger700unse#page/n169/mode/2up>

Note no price is listed as this was part of a collection purchase en bloc from Dewitt Smith.

Regards,
Len.

Subject: Baker 20b

Eric:

It has been a while since I last corresponded with you.

I trust all is well.

I was reading the Truth Seeker book about you – neat stuff.

Just a quick note with regard to the gold Baker 20b.

The coin went from Parmelee to Dewitt Smith and then went to Virgil Brand and was entered into his ledgers as #46483.

It was sold to Wayte Raymond circa 1930-2 (the exact date is in the Armin Brand papers in the ANS) and then to Col Green, one of the few coins with a Brand – Col Green pedigree.

Regards,
Saul
